

## How to Complete Project #1 Without a Printer

Hi everyone, many of you have completed this project already and have done a fantastic job. It's very easy to complete this lesson without a printer. Here are some instructions:

For the practice sheets, all you need to do is look at the grid image on your chromebook/phone/tablet.

On a piece of paper, you will need to draw a grid with perfect squares (use a ruler). After the grid is complete, use the picture you chose to fill in the squares. (1" x 1" squares)

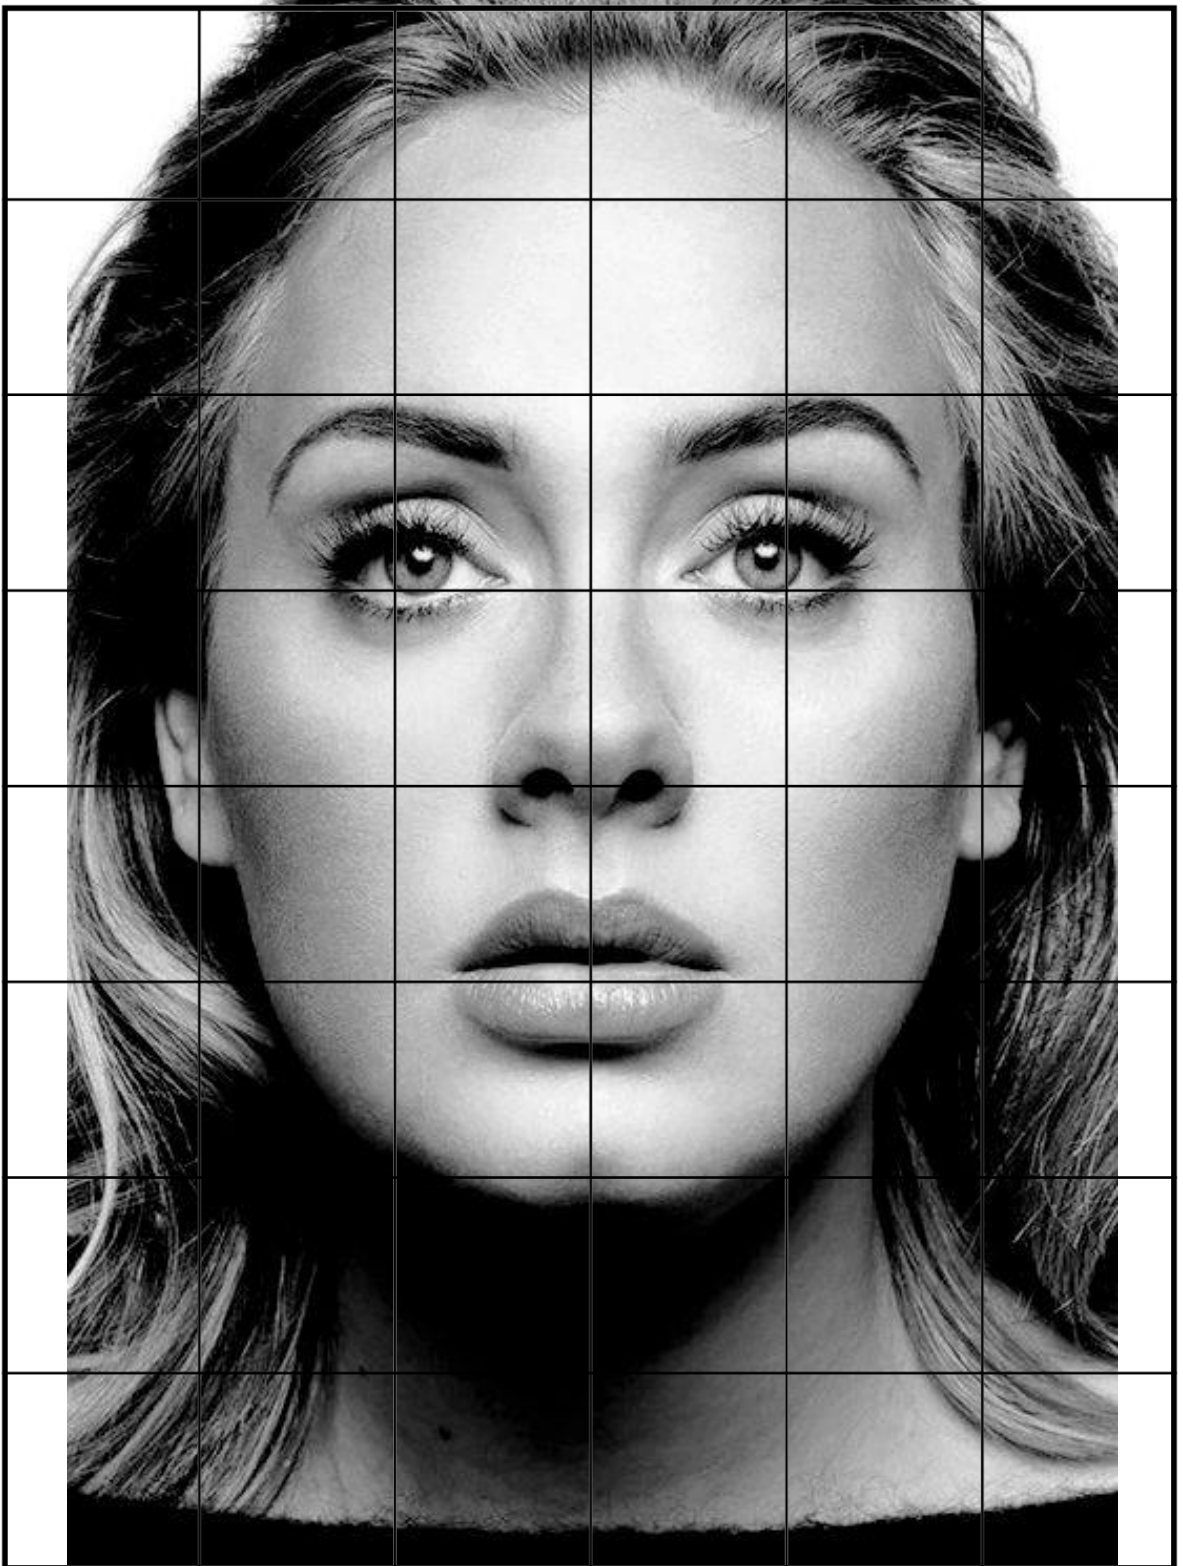

## **Steps to Follow for Your Portrait**

To make it a little easier, if you **do not** have a printer, I have provided a few celebrity portraits on the following pages for you to choose from. Feel free to make your own if you like.

**Step 1:** Pick one that you would like to draw

**Step 2:** On a piece of paper, draw a grid with perfect squares (use a ruler). After the grid is complete, fill in the squares to complete your portrait. (1" x 1" squares)
