Grade 8

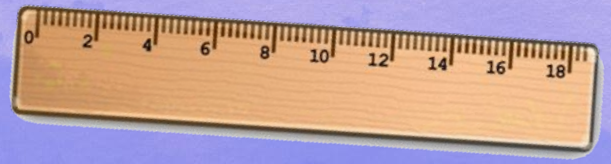
Two-Point
Perspective

Two-Point Perspective

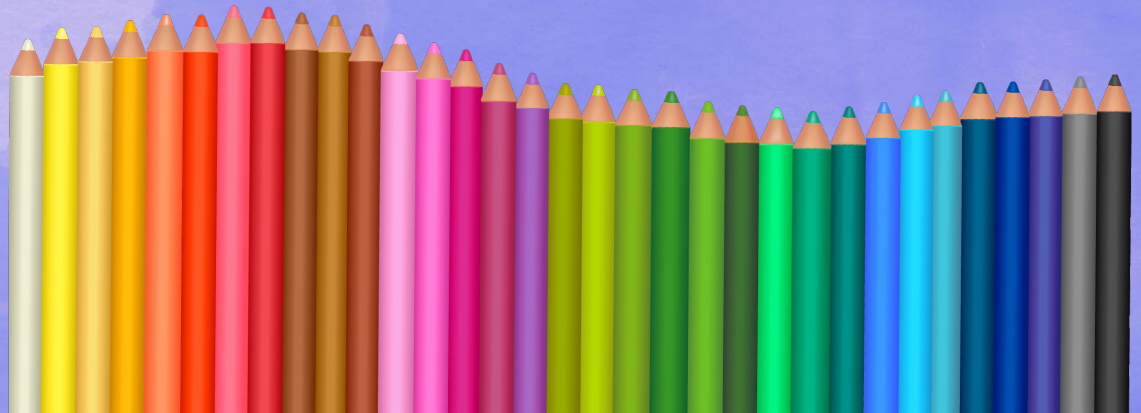
Now that we have had some practice on “Two-Point Perspective” drawing, we will move on to our Two-Point Perspective Project.

As mentioned before, you will be creating a two-point perspective drawing to create the illusion of depth and space in their drawing. Students will draw a room (bedroom, kitchen, bathroom, etc.)

What You Will Need:



- ❑ Pencil
- ❑ Eraser
- ❑ Ruler
- ❑ Variety of colouring mediums (Colouring pencils, Markers, etc.) -Optional
- ❑ Quality Drawing paper (Blank paper is fine)



ROOM DESIGN ASSIGNMENT

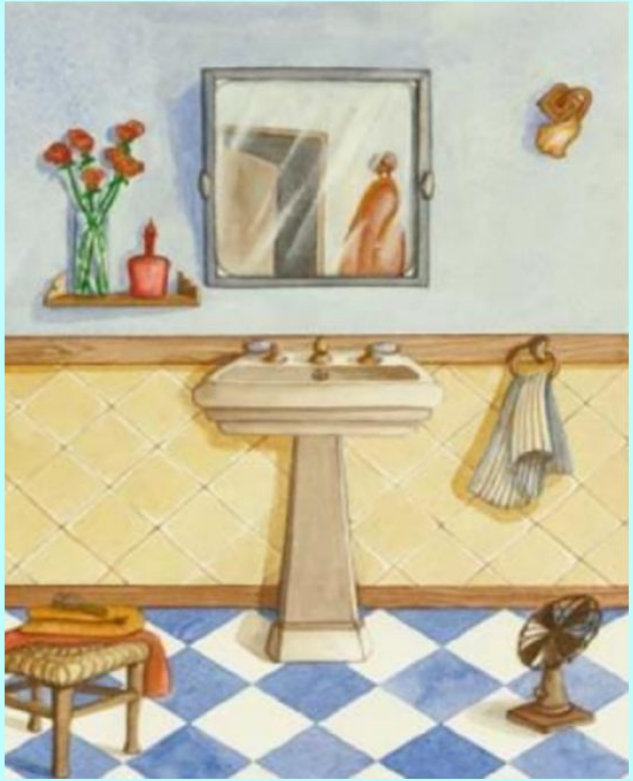
Extend Page

Specific Expectations:

- Create a drawing of a lived-in room (living room, "man-cave," bedroom, kitchen, bathroom, or other)

- Make sure your design shows perspective! Choose a vanishing point and draw at least three objects demonstrating 3-dimensional perspective

- This project should be in colour - so use your pencil crayons.



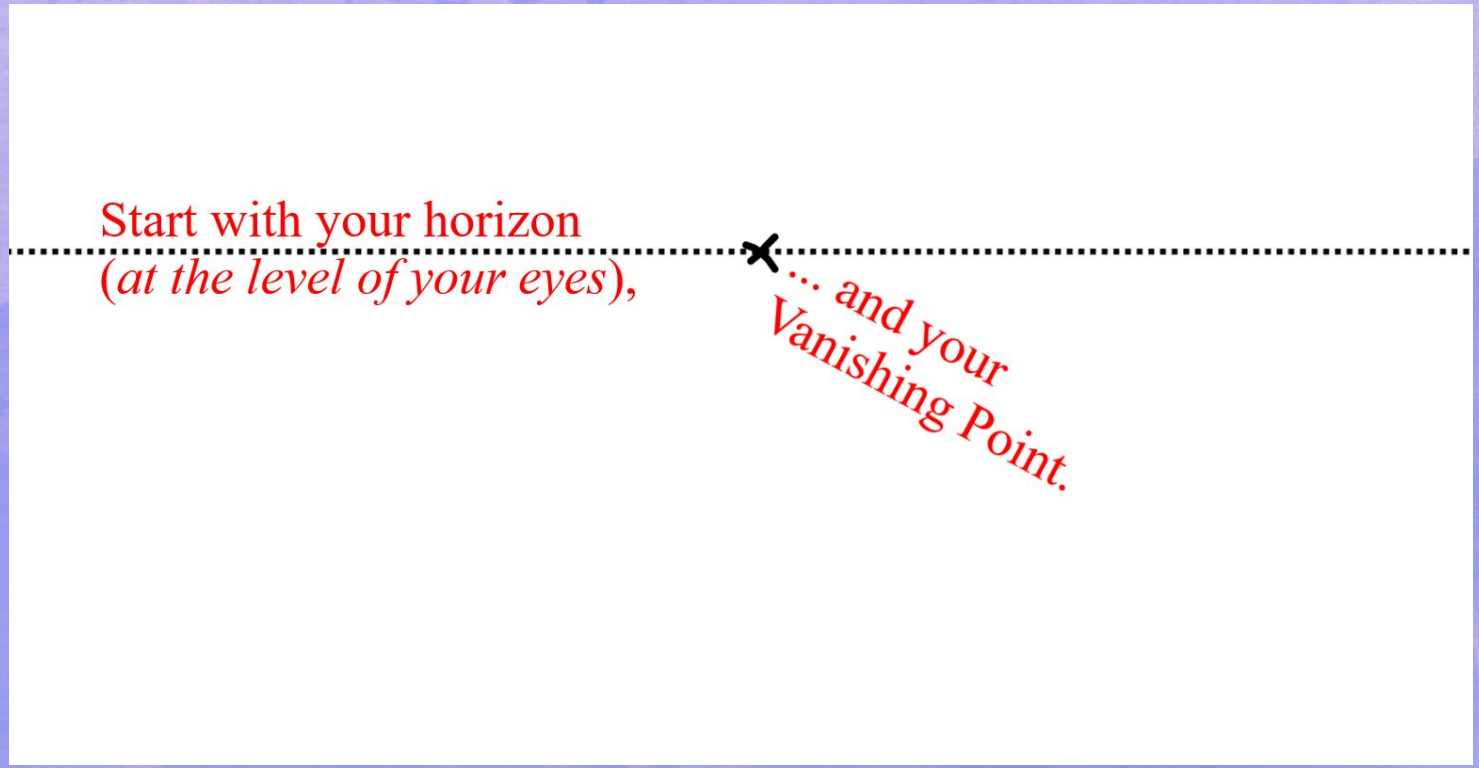
MAKE SURE:

*YOUR IMAGE FILLS SCOPE OF THE PAGE

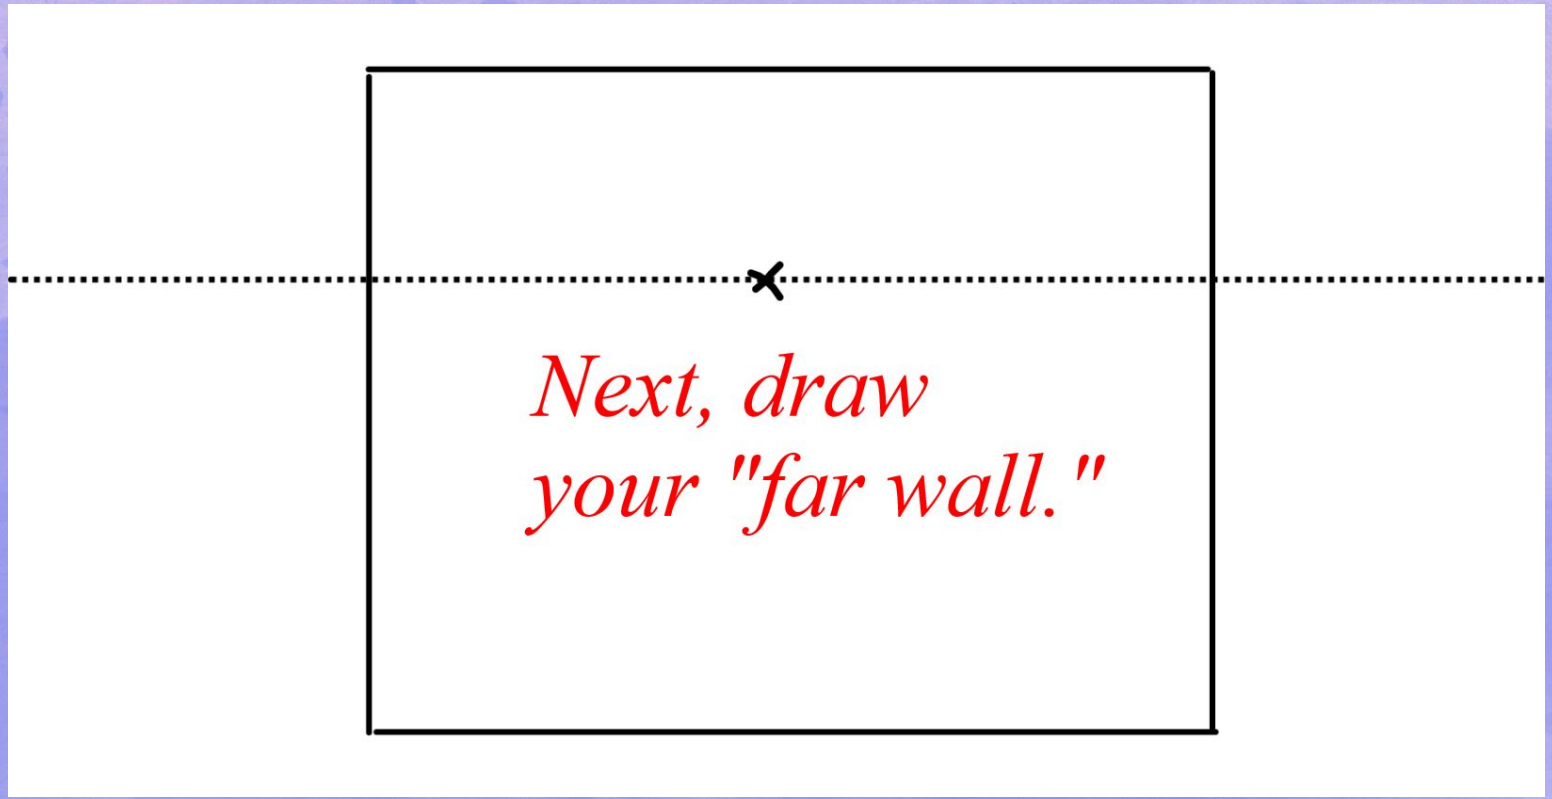
*THE OBJECTS ARE TO SCALE (A CHAIR IS NOT SIGNIFICANTLY SMALLER THAN A TABLE, FOR EXAMPLE)

*THAT THE COLOUR SCHEME IS WELL-THOUGHT OUT (AND COLOURS ARE MIXED AND IN ONE DIRECTION)

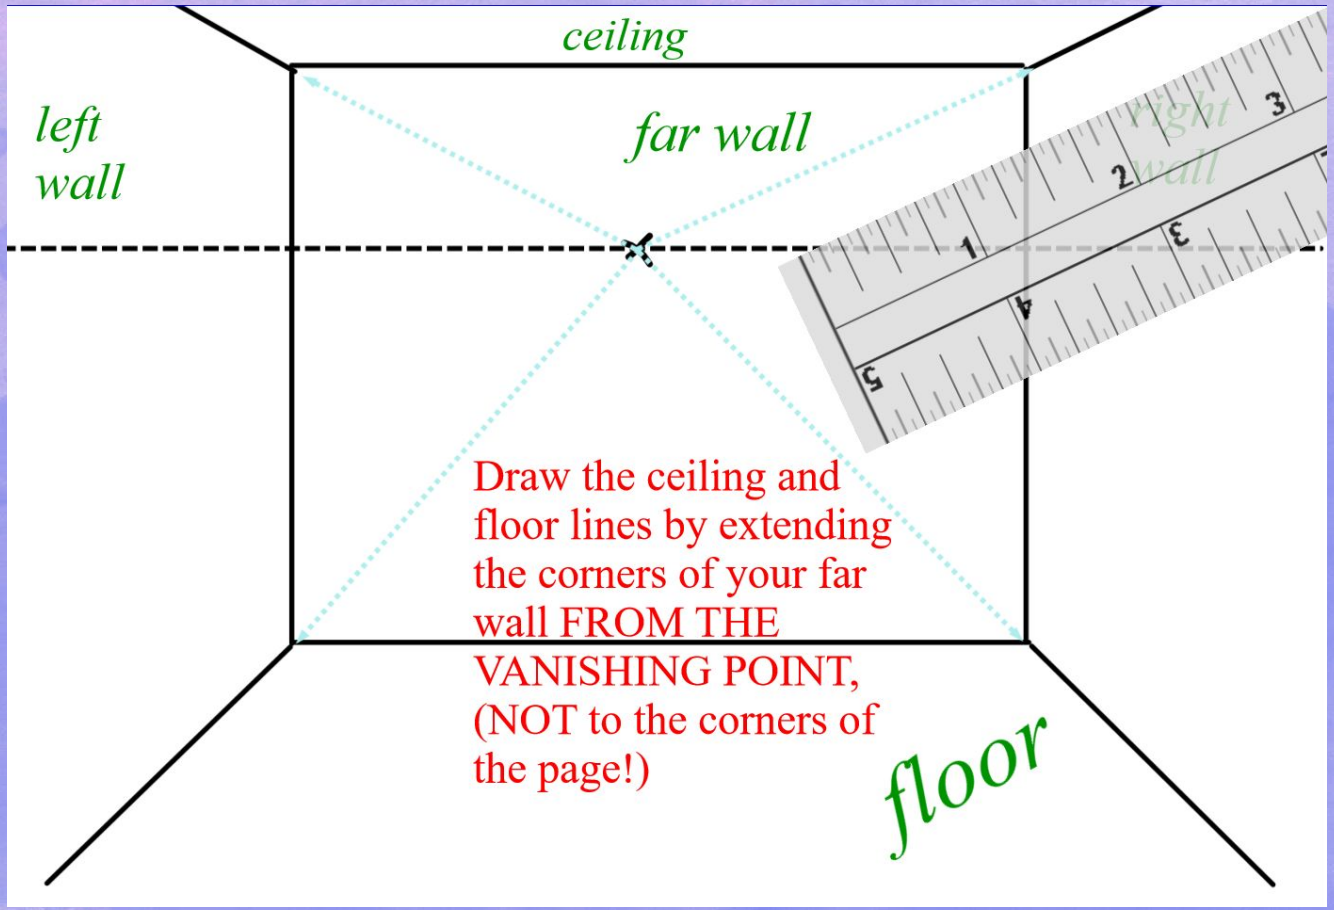
*THAT THE PICTURE IS WELL-PLANNED OUT (THROUGH A ROUGH
COPY) AND CREATIVE.



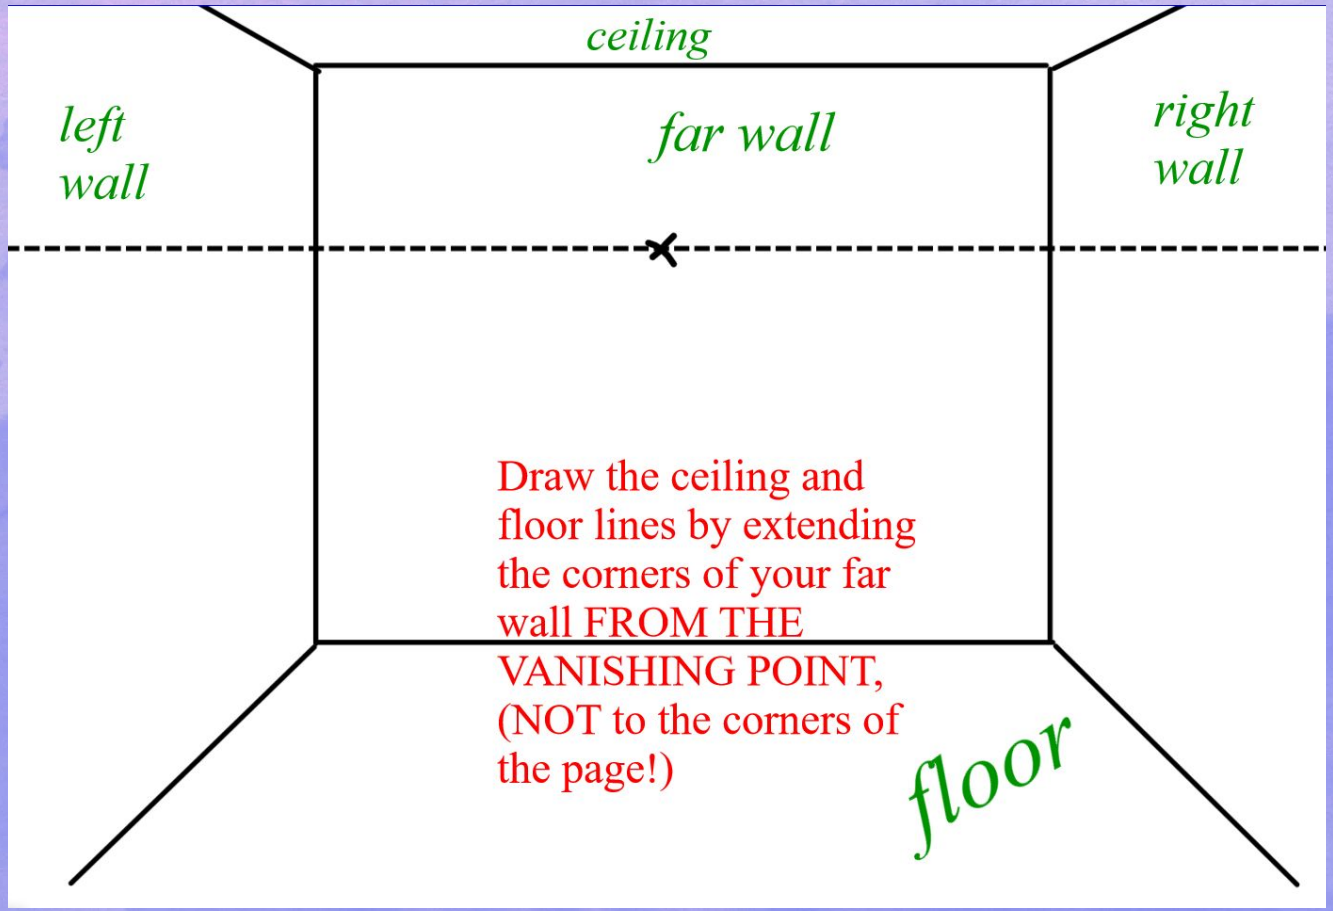
Start with your horizon
(*at the level of your eyes*),
… and your
Vanishing Point.



Next, draw
your "far wall."

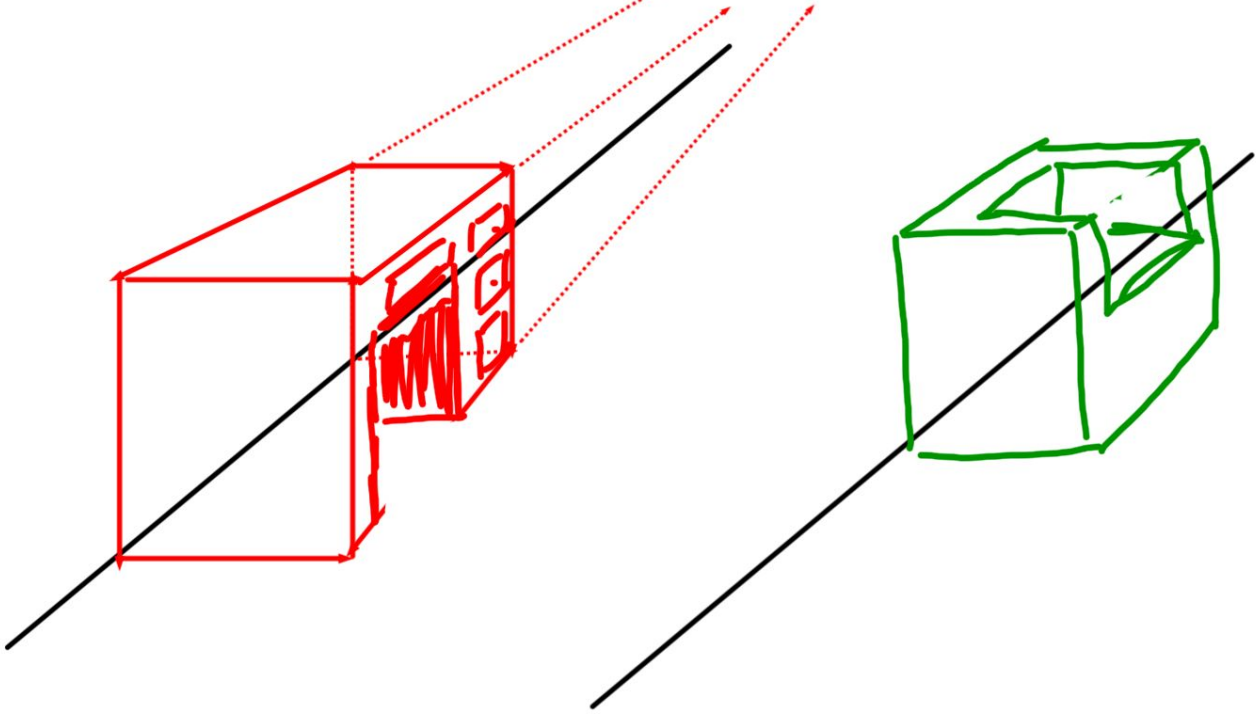


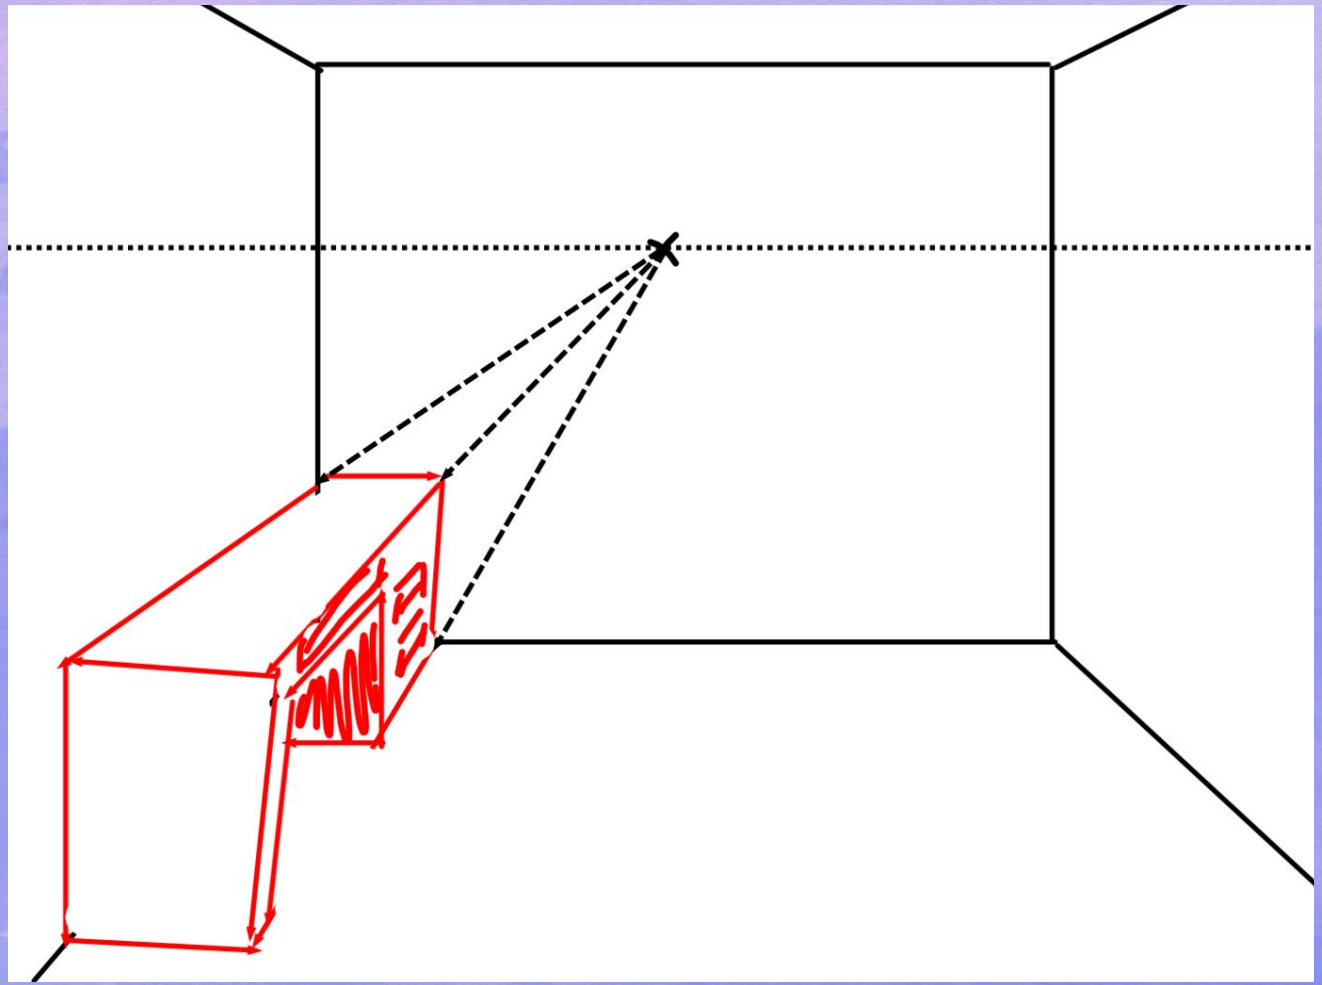
ceiling
left wall
far wall
right wall
Draw the ceiling and floor lines by extending the corners of your far wall FROM THE VANISHING POINT, (NOT to the corners of the page!)
floor

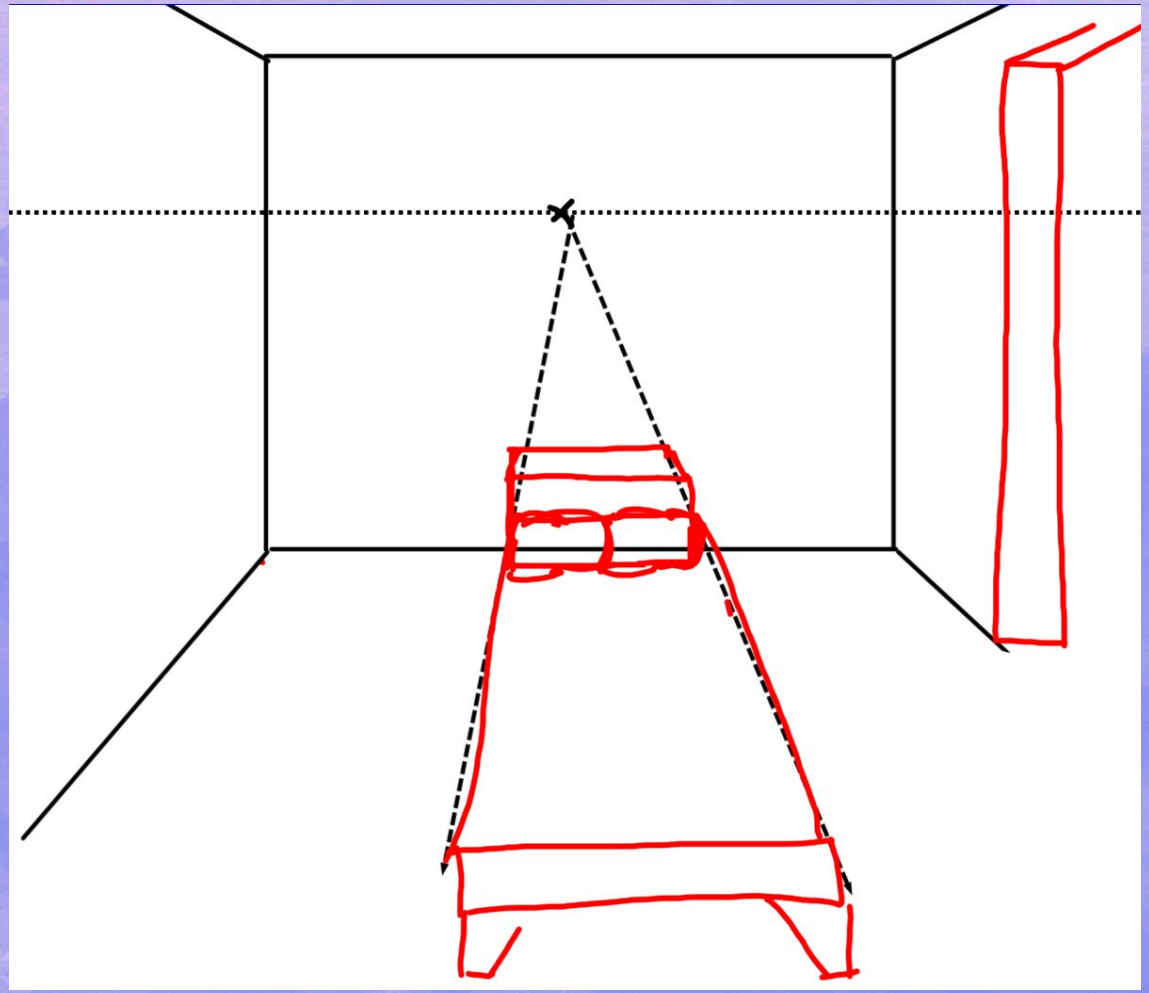


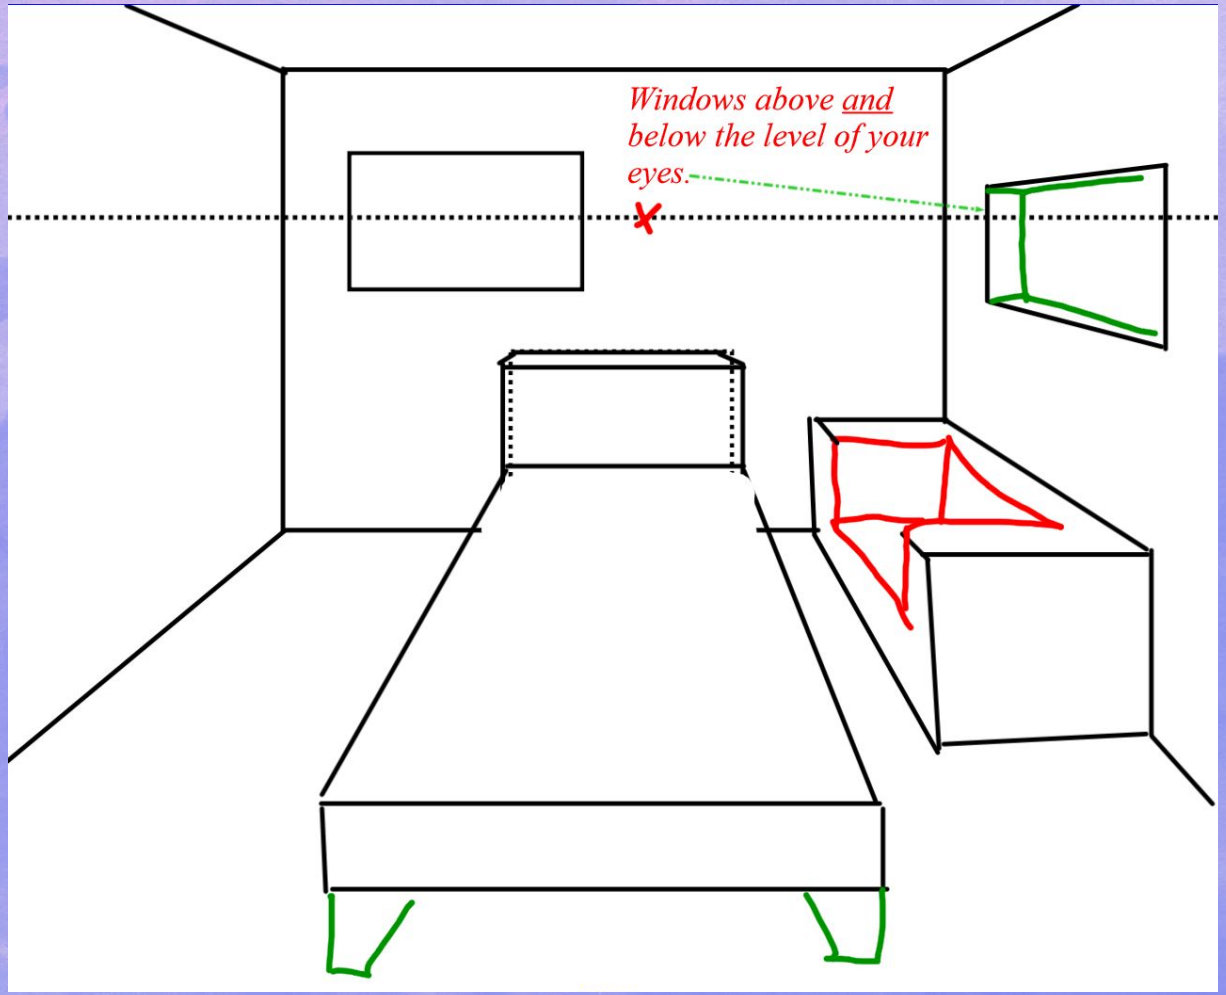
ceiling
left wall
far wall
right wall
Draw the ceiling and floor lines by extending the corners of your far wall FROM THE VANISHING POINT, (NOT to the corners of the page!)
floor

Add furniture by starting with a "box" in the correct position, then "cut out" the empty spaces.









Windows above and
below the level of your
eyes.

COLOUR NEATLY AND IN ONE DIRECTION
